Age Range: 6 - 9 years

Grade Level: 1 - 4

Customer Reviews

Santa brought this to our 7-year old last Christmas, and he still turns to it frequently at night, reading an article about something or another before bedtime. While some of the topics are a bit advanced (there's a section on WWII, for example, which got him asking about Adolf Hitler), the book is a keepsake. Thick, glossy pages, wonderful illustrations, and concise, insightful articles, perfect for a younger advanced reader. We liked this book so much, that we usually keep 2-3 copies on hand to give away at birthday parties. We've seen kids to whom we've given the book as a present reading it the next day on the school bus! If that's not a solid endorsement, I don't know what is! All in all, very highly recommended.

Eloise (almost 6-years old) loves to "read" her Encyclopedia. Especially now since she's actually learned to read. Out loud. Every. single. page. I shouldn't complain. I've learned a LOT.

In the age of computer equipment and tablets this is a throwback to when kids looked up their information. Big pictures, ridged spine, and comprehensive information. I'm sure they will enjoy this for a few years and especially when we take away their devices and send them to their room to read....hehehe

I have purchased three of these books since the beginning of May to give to great-nieces/nephew. So far one mother of a 7-year-old great-niece has told me how much her little girl (Izzy) loves her encyclopedia. She related to me how she and Izzy were watching a nature program and Izzy said she had already read about some of the information being discussed in the program. She went and got her book and showed her mother what she had read. At another time Izzy looked up other information that had been presented on a television program to show her mother. She seems to be really enjoying her encyclopedia. I have sent her numerous story books over the last few years. It is nice to also be able to give her a nice, informative book where she will be able to educate herself while instilling a love of reading. This encyclopedia appears to be a hit with at least one of my great-nieces.

I previously bought the 1000+ Science Facts for my 5 year old. He didn't really care for it, maybe because the information was so sporadically placed and I think the explanations were a little difficult for him to understand. But I recently got this for him since he just started kindergarten. It's easier to read, and easier to understand, and he already loved reading about the Bones and Rocks/Minerals topics. The images are colorful and there's lots of different topics for him to choose from. I think he'll learn a lot of new information from it.

Every parent should buy one of these for their children AND for themselves!!!! This book is amazing. I am learning things from it! Colorful, paper quality is great and it is fun and easy to understand. It deserves its own spot in your bookshelf!

Our 5 year old loves this book. She is a avid non-fiction reader, feeding her desire for constant information this encyclopaedia works great to answer a lot of her questions about all sorts of subjects. She actually requests pages as her bedtime 'story' although the information on each

subject is brief, it makes a great starting point to lead into a discussion or to pique her interest in learning more. She took this book to school when they were asked to bring in their favourite book!!

Dear ,Thank you for the New Childrens Encyclopedia.Yes, It has meet my expectation. Very beautifully layed out and easy to read and understand.Capturing for the younger children.RegardsMarie
