# Are Trees Alive?

## **Synopsis**

"Are trees alive? How do they breathe? They don't have noses." And so begins a conversation between the author and her daughter that leads to a remarkable discovery: Trees are like children in so many ways! They may look very different from people, but trees have roots that hold them to the ground like feet and leaves that blow in the wind like hair. Their bark even comes in different colors, just like our skin. From this poetic comparison of plants and humans, readers will learn how trees live and grow, and how they get their food. They will learn about the baobab trees of Africa, the banyan trees of India, and the bristlecone pines of California. They will see, through Stacey Schuett's exquisite art, that trees come in all shapes and sizes-just like people-and provide a home to many different animals. But most of all, they will look at trees with greater respect and a bit of awe, after realizing that trees are alive too.

## **Book Information**

Lexile Measure: 640L (What's this?)

Hardcover: 32 pages

Publisher: Walker Childrens (January 1, 2003)

Language: English

ISBN-10: 0802788017

ISBN-13: 978-0802788016

Age Range: 4 - 8 years

Grade Level: Preschool - 3

## **Customer Reviews**

Wonderful book for children. Learning about the importance of trees and the characteristics of trees is great for young children. This book not only teaches children about trees, but it also encourages children to take care and respect trees.

This is an outstanding book for elementary children learning about nature. In beautiful poetic language, it shows how trees and humans are alike. For example, it explains how bark protects the inside of a tree just like skin protects the inside of a person. The illustrations are lovely - rich and colorful and multicultural. Love this book!!

I love this book, perfect preschool to kindergarten story that includes diverse trees and children.

Beautifully illustrated, informative book. Highly recommended for grades K-2.
