ISBN-10: 0531147630

ISBN-13: 978-0531147634

Product Dimensions: 8 x 6.5 x 0.2 inches

Shipping Weight: 1.6 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 starsÂ  See all reviewsÂ  (4 customer reviews)

Best Sellers Rank: #515,006 in Books (See Top 100 in Books) #279 inÂ  Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Astronomy #4995 inÂ  Books > Children's Books > Literature & Fiction > Chapter Books & Readers > Beginner Readers #6606 inÂ  Books > Children's Books > Science, Nature & How It Works

Age Range: 6 - 7 years

Grade Level: 1 - 2

## **Customer Reviews**

I love this series of books! I use them with my second graders when we do our non-fiction reports. This particular book (series) is great for lower readers / struggling readers. Lots of great pictures, non-fiction text features, and big print makes it easy for even struggling readers to gather important facts and be successful while their peers are working with higher level texts.

I mentioned a comet I saw earlier to people at my 3year old gret-nephews birthday party, he heard me and hasn't let it go since. Draws comet pictures and email them to me so I thouht, "I perfect, I will send him a book about comets!great book, for 6 years old and up but he loves it! called to say "can I tell you something? Comets are made of dust adn gases"

My 5 year old is really interested in outer space and the planets. I purchased this book along with The Sun, The Moon, and the Little Big Box of Planets: And Pluto, Too! He loves them! And he's not the only one. Every time I read these books, and I have read them REPEATEDLY, I am always amazed by some fact. I would highly recommend this book and any of the books in this series.

This book claims that "Mercury has no gravity" and that "volcanoes are made of lava". I realize the science needs to be simplified for a young audience, but it should stick to facts.
