Synopsis

Millions of years ago, Earth was populated by animals unlike any that we know today. The only way to learn anything about these extinct species is to study the remains they have left behind in Earths rocks and soil. Readers will discover how paleontologists dig deep to discover these remains and how they use them to learn more about the plants and animals that once covered the planet.

Best Sellers Rank: #133,023 in Books (See Top 100 in Books) #17 inÂ Books > Children's Books > Education & Reference > Science Studies > Nature > Fossils #19 inÂ Books > Children's Books > Education & Reference > History > Prehistoric #87 inÂ Books > Children's Books > Education & Reference > Science Studies > Earth Sciences

Age Range: 7 - 9 years

Grade Level: 2 - 4

Customer Reviews

Grandson is 9. He loves all the info from the books. Easy to understand & good pics. Would recommend for kids.

With a 6year old grandson who wants to be a Paleontologist, this was a perfect gift!

found the book very disappointing. it was geared to a young child level. i felt the advertising of the book was very misleading. it was written in very large print and consisted of about 10 pages. i would not recommend anyone to purchase for the price and cost of shipping

For a grandson who is crazy about science, especially paleontology, he was more than pleased with the book.
