Oceans: Dolphins, Sharks, Penguins, And More!

Synopsis

Swim with sharks! Dive with dolphins! Stroll the beach with penguins! Young readers will joyfully immerse themselves in this awesome adventure at sea, in which stunning National Geographic photos reveal hidden worlds of action and beauty. We meet 30 favorite sea creatures and explore their watery homes: playful dolphins, mysterious sharks, graceful sea turtles, waddling penguins, and dozens of others. Kids will marvel at speedy swimmers on the hunt, and smile at cuddly scenes of animal families. To give background on the attention-grabbing photographs, each page is sprinkled with fun facts and layered with information about ocean wildlife and environments. Age-appropriate text tells each animal's story in language that's accurate, lively, and non-intimidating. National Geographic maps encourage kids to learn about the geography of land and sea. Conservation tips help readers of all ages understand how we can be kind to the oceans. At home in the classroom and on the family bookshelf, is a trove of thrilling sights and discoveries. Timed to coordinate with the release of Disney's much-anticipated movie on Earth Day 2010, this exciting book taps into and encourages new awareness about the world's marine environments.

Customer Reviews

My eight-year old grandson loved this book, making his grandmother very happy that because of great reviews she is considered tops with her grandson.

My grandchildren love this book it is very interesting and fun to read and find things. It was a great buy.

Excellent photographs, especially for young students, with very good information and a nice layout for the entire book. A good addition for a home library, so children don't depend on the computer for information.

Beautiful real pictures. Very informative a great resource for the classroom when developing an ocean unit for the primary grades.

Heard about the book through a friend. Found it to be a great read for the kids. My eldest (3rd Grade) has not put it down. My little ones (3 & 1 yrs old) love the pictures. Overall, very pleased with the purchase. Would make a nice gift for a kid very into ocean life.

What a beautiful book! I plan to use it in my class teaching about the Earth's Oceans and ocean animals. I was very impressed with the packing procedures from this seller... perfect condition.

I would recommend this book to any toddler or even bigger kid. We read it with our son since he was 1 and after 2 years it's still among our top 10 favorite books.

When I looked online at what the book had to offer I thought I would be great for my 10 year old cousin but when I received it and started looking through the pages it wasn't at all what I was expecting. I was disappointed at how little information and pictures were available. It was easily readable in under an hour and has less information than what she had learned in school. Petco had a better book on Marine Biology so I'll be returning this one.
