Under The Sea (Picture Books)

Synopsis

This picture book takes the reader on a journey all the way through the sea from one shore to another far across the world. From a bustling bright coral reef (by day and by night), out into the open sea to swim alongside giant whales, and diving down and down to discover what lives in the deepest darkest part of the ocean. This book introduces a child to the wonders of the sea and all kinds of sealife. The stunning images and lyrical text will leave a lasting impression, and can be treasured again and again. --This text refers to an out of print or unavailable edition of this title.

Book Information

Series: Picture Books

Age Range: 5 and up

Grade Level: Kindergarten and up

Customer Reviews

This is beautiful, colorful picture book that is great for children around 2 to 6. [...] They love looking at pictures and having it read to them. It is sturdy and a great discovery book. Older children will love the "Great Undersea Search" full of things to spot under the sea. Great educational stuff and it's fun.

This a great book for any little one who loves learning about the sea and the creatures that live within it. I purchased this for my daughter when she was three. Her love of sea creatures began with Ariel, LOL. From that movie she got interested in sea horses, fish, lobsters, and the like. When I

gave her this book, she was in heaven. The book is beautifully illustrated, and initially she would spend hours poring over the pictures (not uninterrupted hours of course, she was only 3, but....) Today, at age six, she still loves this book. Now she likes reading about the various animals portrayed in the book. Her three year old brother loves looking at the pictures, while she reads the book to him. I highly recommend this book for any child who loves the sea. The recommended age group is 5 and older, but, IMO, even children as young as 2 can appreciate this book.

My 2 year old son loves this book. He requests "the sea book" quite often. I like that it has real creatures and actually teaches him about nature. He points to the animals and says "fish", "whale", "turtle"....He's liked it since he was very little.

My 18 month old son loves this book!!! He'll sit down and name/watch all the sea creatures again and again! The only problem I see with this book is that papers are little thinner for the small toddler. Otherwise very educational and entertaining.

I bought this book for a few of my grandkids ranging in age from 6 to 10. While generally the book was above their age level, they still very much enjoyed the fantastic pictures and the older kids enjoyed reading part of it as well.
